Education

ACE Engineering College

Bachelor of Technology - Computer Science and Engineering (IoT); CGPA: 7.8

Technical Skills

- **Languages:** C, C++, Java(Basic)
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** MongoDB(Basic), MySQL
- **Core Concepts:** Data Structures and Algorithms(Basic), OOPs
- **Tools :** Git, GitHub, Visual Studio Code

Projects

Smart Car Control System (IoT Project)

- Developed an IoT-based system to control vehicle functions remotely
- Used motion-based input for controlling operations
- Enabled real-time communication between devices
- **Tools & Technologies:** ESP32, MPU6050 Sensor, ESP-NOW, Embedded C

InfoCars – Car Information Web Application

- Developed a responsive web platform to showcase luxury vehicles
- Designed interactive UI to display car details and features
- Focused on frontend development and user experience
- **Tools & Technologies:** HTML, CSS, JavaScript

Garbage Classification (Machine Learning Project)

- Built a CNN-based model to classify waste images
- Trained model using image datasets for prediction
- Gained practical knowledge of machine learning workflow
- **Tools & Technologies:** Python, TensorFlow, Keras, Google Colab

Achievements & Certifications

- Solved 50+ DSA problems on LeetCode using Java/C++.
- Received a Consolation Prize in the Hackathon organized by SkillTyro & Programming Hub.
- Completed TCS iON Career Edge – Young Professional Program
- Recognized by Institution's Innovation Council (IIC – MoE) for developing a Fire & Smoke Alarm Prototype
